# Contents *Ecological Modelling*, Vol. 58

Testing the utility of first order uncertainty analysis
S.J. Haness (Richardson, TX, USA), L.A. Roberts (Nashville, TN, USA), J.J. Warwick (Richardson, TX, USA) and W.G. Cale (Indiana, PA, USA) ..... 1
A water quality model for a river receiving paper mill effluents and conventional sewage
J.K. Summers (Gulf Breeze, FL, USA), P.F. Kazyak and S.B. Weisberg (Columbia, MD, USA) ..... 25
Object-oriented simulation: plant growth and discrete organ to organ interactions
R.A. Sequeira, P.J.H. Sharpe (College Station, TX, USA), N.D. Stone (Blacksburg, VA, USA), K.M. El-Zik and M.E. Makela (College Station, TX, USA) ..... 55
Self-purification in a lotic ecosystem: a model of dissolved organic carbon and benthic microorganisms dynamics
B. Cazelles (Paris, France), D. Fontvieille (Chambéry, France) and N.P. Chau (Paris, France) ..... 91
A model of environmental protection by a mutualist
M.E. Fisher (Nedlands, Australia) and H.I. Freedman (Edmonton, Canada) .... 119
Patterns in space and time — a new method for their characterization
C. Pahl-Wostl (Dübendorf, Switzerland) ..... 141
Spatial ecosystem modelling using parallel processors
R. Costanza and T. Maxwell (Solomons, MD, USA) ..... 159
Modelling of spatial-temporal dynamics of the bisexual population of *Tribolium confusum*
A.V. Tuzinkevich (Vladivostok, USSR) ..... 185
Simulating transpiration plateaus: the importance of leaf water potential
B.H. Lynn (New Brunswick, NJ, USA) and T.N. Carlson (University Park, PA, USA) ..... 199
Analytical solution of the rectangular hyperbola for estimating daily net photosynthesis
J.D. Hanson (Fort Collins, CO, USA) ..... 209
Modelling tropical deforestation and its consequences for global climate
J. Rotmans and R.J. Swart (Bilthoven, The Netherlands) ..... 217
An area-based model of species richness dynamics of forest islands
J. Wu and J.L. Vankat (Oxford, OH, USA) ..... 249
A new mathematical model of interspecific competition — an expansion of the classical Lotka-Volterra competition equations
Sun Guowei, Cui Qiwu and Song Bo (Shenyang, P.R. China) ..... 273
Predator mediated co-existence of three competing species with L–V type interactions
D. Mukherjee and A.B. Roy (Calcutta, India) ..... 285
Chaotic dynamics in a multiple species fishery: a model of community predation
J.A. Wilson, J. French, P. Kleban, S.R. McKay and R. Townsend (Orono, ME, USA) ..... 303
A higher-order predator-prey interaction with application to observed starfish waves and cycles
P. Antonelli, X. Lin (Edmonton, Canada) and R.H. Bradbury (Canberra, Australia) 323
The influence of varying degrees of spore aggregation on the coexistence of the mosses *Splachnum ampullacuem* and *S. luteum:* a simulation study
P.C. Marino (Edmonton, Canada) ..... 333

Using massively-parallel supercomputers to model stochastic spatial predator-prey systems
Mark Smith (Edinburgh, UK) ..... 347
A preliminary mathematical model of the apple twig borer (Coleoptera: Bostrichidae) and grapes on the Texas High Plains
L.J.S. Allen, M.J. Strauss, H.G. Thorvilson and W.N. Lipe (Lubbock, TX, USA) 369
Aggregation in models of ecosystems dynamics and stability problems
E.D.-A. Alymkulov (Moscow, USSR) ..... 383
*Author Index* ..... 387
